Claims:

What is claimed is:

1. A conversation manager for managing the flow of messages in a collaboration system, comprising:

a conversation initiation mechanism for initiating a conversation; a participation registration mechanism for registering participants in a conversation; and,

a conversation repository for storing conversation management data.

- 2. The conversation manager of claim 1 wherein the conversation manager controls the flow of conversation between the participants.
- 3. The conversation manager of claim 2 wherein the conversation includes a plurality of messages passed between two or more participants.
- 4. The conversation manager of claim 1 wherein the conversation manager controls a publish/subscribe service for accepting messages and sending messages to and from participants.
- 5. The conversation manager of claim 4 wherein a registered participant may send messages to the publish/subscribe service for distribution to one or more participants.

- 6. The conversation manager of claim 1 wherein a conversation is initiated by an initiator participant authorized to initiate conversations.
- 7. The conversation manager of claim 5 wherein the conversation repository includes instructions for the distribution of messages sent via the publish/subscribe service to the participants.
 - 8. The conversation manager of claim 1 wherein a conversation may be terminated by a terminator participant authorized to terminate conversations.
 - 9. The conversation manager of claim 1 wherein a conversation may be aborted by the conversation manager.
 - 10. The conversation manager of claim 8 wherein a participant in an aborted conversation may be compensated for automatically by a substitute participant.
- 11. A method for managing conversations in a collaboration system, comprising the steps of:

initiating a conversation;

registering participants in a conversation; and,

storing conversation management data in a conversation repository.

25 12. The method of claim 11 including controlling the flow of conversation between the participants.

- 13. The method of claim 12 wherein the conversation includes a plurality of messages passed between two or more participants.
- 14. The method of claim 11 including controlling a publish/subscribe service for accepting messages and sending messages to and from participants.
- 15. The method of claim 14 including sending a message from a registered participant to the publish/subscribe service for distribution to one or more participants.
- 16. The method of claim 11 including initiating a conversation by an initiator participant authorized to initiate conversations.
- 17. The method of claim 15 including storing in the conversation repository instructions for the distribution of messages sent via the publish/subscribe service to the participants.
- 18. The method of claim 11 including terminating a conversation by a terminator participant authorized to terminate conversations.
 - 19. The method of claim 11 including aborting a conversation may be aborted by the conversation manager.
- 20. The method of claim 18 including compensating automatically for an aborted conversation participant by using a substitute participant.
